Forecast for Sunday 01 May 2022

Weather: Periods of rain through the early hours, possibly heavy at times. Damp on Sunday morning with low cloud, mist, hill fog and further periods of rain and drizzle, especially across the hills. Staying cloudy with extensive mist and fog over the hills into the afternoon. Rain becoming more fragmented later but further outbreaks of rain and drizzle persisting in places well into the evening.

Chance of cloud-free hill tops above 600m: 20% or less

Low cloud and visibility: Persistent cloud above 400-500m for most of the day with periods above 200-300m at times. This will give widely very poor visibility on most hills and mountains with visibilities in the valleys also poor at times during periods of rain and drizzle.

Meteorologist's View

Low cloud and persistent rain will make navigation challenging at best on the mountains. Given the heavy rain water proof clothing will a necessity, as well as appropriate footwear given the slippery surfaces.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Fri 29 Apr 2022	0mm	0mm	0mm

Forecast for Monday 02 May 2022

Weather: Mostly cloudy with scattered showery outbreaks of light rain and drizzle during the day, Some sunnier or brighter conditions developing during the afternoon as cloud lifts, particularly across eastern areas of the park.

Maximum wind: Southwesterly 15-20 mph.

Chance of cloud-free hill tops above 600m: 20% or less, rising to 60% from mid afternoon

Low cloud and visibility: Extensive cloud with bases widely between 400-500 meters will give poor visibilities near summits. Below cloud bases visibility will be generally good outside of any showers. Visibilities improving from mid-afternoon as cloud breaks and lifts above the level of summits.

Temperature: **Valleys:** Plus 6 Celsius rising to plus 12 Celsius.
At 600m: Plus 8 Celsius.
Freezing level: Above the summits.
